JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 101, Numbers 1, 2, 15 January 1999

Contents

Y. Qiu and D.M. Sloan
Analysis of difference approximations to a singularly perturbed two-point boundary value problem on an adaptively generated grid 1

C.M. McCarthy
The tallest column — optimality revisited 27

G. Zhang, S.S. Cheng and Y. Gao
Classification schemes for positive solutions of a second-order nonlinear difference equation 39

H. Alzer and O.G. Ruehr
A submuiltiplicative property of the psi function 53

C. Musschoot
A Lanczos-type method for solving nonsymmetric linear systems with multiple right-hand sides – matrix and polynomial interpretation 61

S.B. Damelin
Smoothness Theorems for generalized symmetric Pollaczek weights on (−1, 1) 87

N.H. Cong
Continuous variable stepsize explicit pseudo two-step RK methods 105

M.S. Floater and C. Gotsman
How to morph tilings injectively 117

B. Koren and A.C.J. Venis
A fed back level-set method for moving material–void interfaces 131

P.J. van der Houwen and E. Messina
Parallel Adams methods 153

P. Levrie and A. Bultheel
A note on the relation between two convergence acceleration methods for ordinary continued fractions 167

H. Wendland
On the smoothness of positive definite and radial functions 177

S. Blanes and L. Jódar
Continuous numerical solutions of coupled mixed partial differential systems using Fer's factorization 189

F. Kuijt and R. van Damme
Monotonicity preserving interpolatory subdivision schemes 203

M. Foupouagnigni, A. Ronveaux and W. Koepf
Fourth order q-difference equation for the first associated of the q-classical orthogonal polynomials 231

J. Abad and J. Sesma
Buchholz polynomials: a family of polynomials relating solutions of confluent hypergeometric and Bessel equations 237

A.B. González, J. Getino and J.M. Farto
An algorithm for an eigenvalues problem in the Earth rotation theory 243

W.F. Trench
Invertibly convergent infinite products of matrices 255
